Formula for Pricing Individual Pots in a Set

Please note:

- Size 1 is always the largest size in the set
- 20% of the price of the pot = the saucer

3 Piece sets

Size 1 – 50% cost of the set

Size 2 – 31% cost of the set

Size 3 – 19% cost of the set

4 Piece sets

Size 1 – 42% cost of the set

Size 2 – 30% cost of the set

Size 3 – 18% cost of the set

Size 4 – 10% cost of the set

5 Piece sets

Size 1 – 40% cost of the set

Size 2 – 27% cost of the set

Size 3 – 16% cost of the set

Size 4 – 9% cost of the set

Size 5 – 8% cost of the set

6 Piece sets

Size 1 – 39% cost of the set

Size 2 – 24% cost of the set

Size 3 – 15% cost of the set

Size 4 – 10% cost of the set

Size 5 – 7% cost of the set

Size 6 – 5% cost of the set

Remember, these are only approximations and you should use your judgment in assigning a cost price to each pot in a set. You may wish to assign a higher or lower value to a specific pot size based upon what you believe your customer's perceived value of that pot would be.
